CONTENTS OF VOLUME 417

October 1989

NORTH R.A. & UCHIMURA N. 5-Hydroxytryptamine acts at 5-HT_2 receptors to decrease potassium conductance in rat nucleus accumbens neurones. 1

MITCHELL J.H., REEVES D.R. JR, ROGERS H.B. & SECHER N.H. Epidural anaesthesia and cardiovascular responses to static exercise in man. 13

DAVIS Robin L. Voltage-dependent properties of electrical synapses formed between identified leech neurones *in vitro*. 25

GILLO Boaz, LANDAU Emmanuel M., MORIARTY Thomas M., ROBERTS James L. & SEALFON Stuart C. A novel calcium-dependent chloride current in *Xenopus* oocytes injected with brain messenger RNA. 47

KARIM F., MAJID D.S.A. & SUMMERILL R.A. Sympathetic nerves in the mediation of renal response to localized stimulation of atrial receptors in anaesthetized dogs. 63

BLOOM S.R., EDWARDS A.V. & JONES C.T. Neuroendocrine responses to stimulation of the splanchnic nerves in bursts in conscious, adrenalectomized, weaned lambs. 79

APPENTENG Kwabena, CONYERS Lisa & MOORE Jane A. The monosynaptic excitatory connections of single trigeminal interneurones to the V motor nucleus of the rat. 91

GÄHWILER Beat & LLANO Isabel Sodium and potassium conductances in somatic membranes of rat Purkinje cells from organotypic cerebellar cultures. 105

HESS R.F., MULLEN K.T., SHARPE L.T. & ZRENNER E. The photoreceptors in atypical achromatopsia. 123

HESS R.F., MULLEN K.T. & ZRENNER E. Human photopic vision with only short wavelength cones: post-receptoral properties. 151

MILEDI R., PARKER I. & WOODWARD R.M. Membrane currents elicited by divalent cations in *Xenopus* oocytes. 173

MCVICAR Brian A. & TSE Frederick W.Y. Local neuronal circuitry underlying cholinergic rhythmical slow activity in CA3 area of rat hippocampal slices. 197

FISCHMEISTER Rodolphe & SHRIER Alvin Interactive effects of isoprenaline, forskolin and acetylcholine on Ca^{2+} current in frog ventricular myocytes. 213

HUME Richard I. & THOMAS Steven A. A caclium- and voltage-dependent chloride current in developing chick skeletal muscle. 241

BOURQUE Charles W. Ionic basis for the intrinsic activation of rat supraoptic neurones by hyperosmotic stimuli. 263

RABY Wilfrid N. & RENAUD Leo P. Dorsomedial medulla stimulation activates rat supraoptic oxytocin and vasopressin neurones through different pathways. 279

KARIM F., POUCHER S.M. & SUMMERILL R.A. Effects of small changes in carotid sinus pressure on renal haemodynamics and function in dogs. 295

YAWO Hiromu Rectification of synaptic and acetylcholine currents in the mouse submandibular ganglion cells. 307

DALY M. de Burgh & KIRKMAN E. Differential modulation by pulmonary stretch afferents of some reflex cardioinhibitory responses in the cat. 323

MARUYAMA Yoshio Activation and desensitization mechanisms of muscarinic current response in single pancreatic acinar cells of rats. 343

REES H. & ROBERTS M.H.T. Activation of cells in the anterior pretectal nucleus by dorsal stimulation in the rat. 361

REES H. & ROBERTS M.H.T. Antinociceptive effects of dorsal column stimulation in the rat: involvement of the anterior pretectal nucleus. 375

FARBER J.L., HOLOWECKY Olha O., SERRONI Ada & VAN ROSSUM G.D.V. Effects of ouabain on potassium transport and cell volume regulation in rat and rabbit liver. 389

FINLEY Rita B. & SMITH Philip L. Stimulation of chloride secretion by *N*-formyl-methionylleucylphenylalanine (FMLP) in rabbit ileal mucosa. 403

BAKER M.A. Effects of dehydration and rehydration on thermoregulatory sweating in goats. 421

LUNDBERG Johan, NORGREN Lars, RIBBE Else, ROSÉN Ingmar, STEEN Stig, THÖRNE Johan & WALLIN B. Gunnar Direct evidence of active sympathetic vasodilatation in the skin of the human foot. 437

GILES W. & SHIMONI Y. Slow inward tail currents in rabbit cardiac cells. 447

GILES W. & SHIMONI Y. Comparison of sodium–calcium exchanger and transient inward currents in single cells from rabbit ventricle. 465

MACDONALD Robert L., ROGERS Carl J. & TWYMAN Roy E. Barbiturate regulation of kinetic properties of the $GABA_A$ receptor channel of mouse spinal neurones in culture. 483

SCHEMANN M. & WOOD J.D. Electrical behaviour of myenteric neurones in the gastric corpus of the guinea-pig. 501

SCHEMANN M. & WOOD J.D. Synaptic behaviour of myenteric neurones in the gastric corpus of the guinea-pig. 519

BERS Donald M., BRIDGE John H.B. & SPITZER Kenneth W. Intracellular Ca^{2+} transients during rapid cooling contractures in guinea-pig ventricular myocytes. 537

MATSUBARA I., MAUGHAN D.W., SAEKI Y. & YAGI N. Cross-bridge movement in rat cardiac muscle as a function of calcium concentration. 555

GERBER U., GREENE R.W., HAAS H.L. & STEVENS D.R. Characterization of inhibition mediated by adenosine in the hippocampus of the rat *in vitro*. 567

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

30 *June to* 1 *July* 1989

Oxford Meeting

DEMONSTRATIONS

Irwin W.G., Jamison J.P. & McKinley R.K. A program in BASIC for computer-assisted analysis of peak expiratory flow rate in man. 2*P*

Jack J.J.B., Larkman A.U., Major G., Mason A.J.R. & Stratford K.J. Simplified representations and compartmental modelling of cortical pyramidal neurones. 3*P*

Blakemore Colin, Mittell John D., Stratford Ken J. & Thompson Ian D. An inexpensive computer-assisted morphometric system for light microscopy. 4*P*

Thomas M.V. A fast miniature amplifier with femtoamp input current, for use with ion-sensitive electrodes. 5*P*

Cornelissen P., Howse B., Stein J. & Wallace K. Apparatus for measuring the frequency response of the vergence system in man under natural viewing conditions. 6*P*

Howse B.P.A., McIntyre M.E. & Robbins P.A. Modifications to a cycle ergometer for studying the transition from rest to exercise in man. 7*P*

Shelley A.M. & Woods R.I. A controllable double stain for cells and connective tissue fibres in semi-thin epoxy resin sections. 8*P*

Hall A.C. Apparatus for the measurement of membrane transport at high hydrostatic pressure. 9*P*

Terrar D.A. & White E. A simple technique for modifying the intracellular contents of isolated myocytes from guinea-pig heart. 10*P*

Ashley C.C., Ishii N. & Simpson A.W.M. Simultaneous fluorescence and force measurements from single smooth muscle cells. 11*P*

Baconnier P., Benchetrit G., Eberhard A. & Shea S.A. A programme for breath-by-breath analysis of the shape of respiratory airflow and volume profiles and its use in the comparison between airflow measured at the mouth and airflow derived from measurements of chest-wall movements in man. 12*P*

Cunningham D.J.C., Lloyd B.B., Paterson D.J. & Robbins P.A. A collection of respiratory apparatus and photographs from early research into human physiology at Oxford. 12*P*

COMMUNICATIONS

Cowan F., Eriksen M. & Wertheim D.P.F. Regulation of cerebral blood flow in the newborn preterm human infant. 13*P*

Carter A.M. & Detmer Ann Hepatic blood supply in the growth retarded fetal guinea pig. 14*P*

James D.K. & Pillai Mary Gestational age and heart rate characteristics in the human fetus. 15*P*

Balsara Rohinton, Donner Richard, Dunn Jeffrey M., Heckman James L. & Russo Pierantonio The isolated fetal lamb heart. 16*P*

Bomford J., Bromley L., Francis M.J.O. & Mott J.C. Relation of the increased variability of arterial pressure in anephric fetal lambs to twinning and to plasma levels of sodium and calcium. 17*P*

Dascalu Victor, Fewell James E. & Kondo Colleen S. Carotid-denervation alters the febrile response to bacterial pyrogen in unanaesthetized young lambs. 18*P*

Hanson M.A. & Jensen A. Cardiovascular responses to acute asphyxia in carotid sinus denervated and intact fetal sheep near term. 19*P*

Bennett L.A., Gluckman P.D., Hanson M.A., Johnston B.M. & Moore P.J. Almitrine mimics hypoxia in fetal sheep with lateral pontine lesions. 20*P*

Hellström S., Hertzberg T., Lagercrantz H. & Pequignot J.M. Resetting of arterial chemoreceptors and carotid body catecholamines in the newborn rat. 21*P*

Navarrete Roberto & Walton Kerry D. Postnatal changes in electrotonic coupling between rat lumbar motoneurones studied in an *in vitro* spinal cord–hindlimb preparation. 22*P*

Ferrer J.M.R., Kato N. & Price D.J. Development of corticocortical projections in the visual cortex of normal and monocularly deprived cats. 23*P*

Connell J., Dubowitz L., Dubowitz V., Murdoch-Eaton D., Oozeer R., Wertheim D., Willetts R. & Wootton R. A computerized system for on-line monitoring and analysis of the human neonatal encephalogram. 24*P*

Lagercrantz Hugo, Persson Håkan, Srinivasan Meera & Yamamoto Yuji The developmental expression of some neuropeptide genes in respiration-related areas of the rabbit brain. 25*P*

James D.K. & Pillai Mary Developmental trends of diaphragmatic movements in the human fetus. 26*P*

van Buuren K.J.H., Schiereck P., Veenstra D.M.J. & Zaagsma J. Neuronal noradrenaline uptake in guinea-pig trachealis muscle increases during maturation and diminishes from larynx to bronchial bifurcation. 27*P*

Bassett J.M., Hanson C. & Weeding C.M. Desensitization of β-receptor-mediated responses to adrenaline during prolonged ritodrine administration to fetal lambs *in utero*. 28*P*

Joseph Stephen A. & Walker David W. Cerebrospinal fluid monoamine concentrations under basal conditions and after indomethacin infusion in unanaesthetized fetal sheep *in utero*.

Coulson Rosalind L. & Fowden Abigail L. The effect of cortisol on tissue glucose-6-phosphatase activity in the sheep fetus. 29*P* 30*P*

Habgood M.D. Blood–CSF barrier permeability in very immature rats. 31*P*

Mughal M.Z., Shaw A.J. & Sibley C.P. Evidence for active maternal–fetal transfer of magnesium across the *in situ* perfused rat placenta. 32*P*

Boyd R.D.H., Glazier J., Mohammed T., Sibley C.P. & Stulc J. Potassium transfer across dually perfused rat placenta. 33*P*

Hall W.J. & O'Connell D.P. The cardiovascular and renal responses in the anaesthetized dog to unilateral intrarenal prostaglandin E_2. 34*P*

Brown Morris J., Davenport Anthony P. & Nunez Derek J. Localization of binding sites for [^{125}I] endothelin-1, endothelin-2 and endothelin-3 in rat, pig and human kidneys. 35*P*

Green R. & Sharples J.A. Renal function and plasma volume during hypo-oncotic albumin infusion in the anaesthetized rat. 36*P*

McVicar A.J. Renal responses of conscious rats to hypertonic NaCl infusion. 37*P*

Shirley D.G. & Skinner J. Proximal tubular function in conscious rats during chronic sodium depletion. 38*P*

Giebish G., Green R., Unwin R. & Weinstein A.M. A hypertonic compartment in the renal proximal tubule of the anaesthetized rat. 39*P*

Atherton J.C., Drake R., Kennon S. & Plange-Rhule J. Natriuretic effect of arginine vasopressin in chronically catheterized, conscious rats. 40*P*

Al-Baranzanji K.A. & Balment R.J. The role of the neurohypophysis in central angiotensin II (AII) stimulated natriuresis in the anaesthetized rat. 41*P*

Balment R.J., Brimble M.J., Forsling M.L. & Windle R.J. Plasma oxytocin and sodium excretion in the anaesthetized Brattleboro rat. 42*P*

Abu-Kishk R.A., Noble A.R. & Williams B.C. Atrial natriuretic peptide (ANP) stimulates renin release by superfused rat kidney cortex cells *in vitro*. 43*P*

Baylis P.H. & Charlton Judith A. The stimulation of Na^+, K^+-ATPase activity in rat cultured renal medulla by polyamines. 44*P*

Phillips M.E. & Taylor A. Taxol inhibits the hydrosmotic response to vasopressin in isolated rabbit collecting tubules *in vitro*. 45*P*

Case R.M., Rawlings J.M., Seo Y. & St. ward M.C. Water permeability of cell membranes in the isolated perfused rabbit mandibular salivary gland measured by proton NMR spectroscopy. 46*P*

Pinter G.G., Wilson P.D. & Yuen L.S.L. Microvascular permeability in experimental diabetes mellitus in the anaesthetized rat: kidney, heart and skeletal muscle. 47*P*

Bradbury M.W.B., Lightman S.L. & Pinter G.G. Microvascular permeability in experimental diabetes mellitus in the anaesthetized rat: brain, optic nerve and sciatic nerve. 48*P*

Lightman S. & Yuen L. Blood–retinal barrier permeability in the anaesthetized streptozotocin diabetic rat. 49*P*

Jones D.R. & Shelton G. Central cardiovascular dynamics of the anaesthetized alligator (*Alligator mississippiensis*). 50*P*

Harding D.P., Kirschenlohr H.L., Metcalfe J.C., Morris P.G. & Smith G.A. The effect of stimulation frequency on end-diastolic $[Ca^{2+}]_i$ in isolated ferret heart. 51*P*
